

Intego® Software Changes Name to Critical Alert Systems

Developer of the CommonPath™ nurse call system assumes new name as part of the integrated healthcare communications technology company.

Jacksonville, Florida (December 7, 2012) — Critical Alert Systems (CAS) today announced that its subsidiary, Intego® Software LLC, will assume the Critical Alert Systems name. Intego, purchased by CAS in January 2012, has been a pioneer in nurse call technology since 1983 with its software-driven CommonPath™ communication and workflow platform. CAS also operates UCOM Paging and Teletouch Paging and serves as an exclusive reseller for Mobile Heartbeat™ smartphone technology for clinicians.

“Combined, we have more than 500 healthcare facility customers and this name change reflects our integrated offering of technology solutions targeted to their specific needs,” said Critical Alert Systems CEO Ed Meyercord. “CommonPath, along with our other products and services, gives hospitals an unprecedented array of communications and workflow tools that are reliable, flexible and easy to implement.”

The CommonPath platform is the next generation of nurse call systems – a patient-centered, simple-to-use software-based nurse call solution that is configurable, scalable and highly flexible. Eliminating the need for middleware or third-party software, CommonPath helps hospitals leverage investments in existing systems and equipment. Available in direct-to-caregiver, unit-based and centralized modes, the CommonPath nurse call system also provides measureable improvements in patient care and satisfaction as well as staff efficiency and retention.

CommonPath joins the integrated offering of CAS products and services that include critical messaging and mHealth solutions such as Mobile Heartbeat. The Mobile Heartbeat suite consists of three components integrated into a single, intuitive smartphone application and data server. It is designed to deliver a live feed of patient data and test results directly to a clinician’s mobile device, while maintaining HIPAA standards. Mobile Heartbeat also allows real time telemetry and nurse call alarms and lets clinicians quickly find and contact other caregivers in and out of the hospital.

About Critical Alert Systems

Critical Alert Systems (CAS) provides healthcare communications technology solutions that help save lives and deliver faster, more efficient patient care to more than 500 hospitals nationwide. The company’s software-driven CommonPath™ is the next generation of nurse call systems – a patient-centered, simple-to-use system that is highly configurable and scalable and offers measureable improvement in patient satisfaction and staff efficiency. Through its paging services, CAS provides fast and reliable critical messaging for emergency medical and disaster response teams in 13 states in New England and the central southeastern U.S. CAS also is an equity partner with Mobile Heartbeat™, smartphone technology that provides clinicians instant access to critical patient information. More information is available at www.criticalalert.com and www.mobileheartbeat.com.
